December 2019

Universidade do Estado do Rio de Janeiro – UERJ, Rio de Janeiro, Brazil

- Major Project: Forecasted a company's short-term churn rate using time series models to support retention strategies.

EXPERIENCE

- **Senior Data Analyst**

June 2020-November 2022

Bradesco Seguros, Rio de Janeiro, Brazil

- Developed and maintained over 20 interactive dashboards, providing real-time insights that reached 80% of different sections of the company and streamlined decision-making for key stakeholders.
- Built a cost-monitoring model using SAS Enterprise Guide, optimizing hospital negotiations and improving financial efficiency, resulting in up to 30% cost reduction.
- Utilized a combination of SAS, R, and Python to analyze geolocation data, pinpointing and tracking different locations to detect and mitigate fraudulent activities within the healthcare system.
- Provided strategic recommendations by applying advanced statistical methodologies, leveraging over 10 years of experience to guide and train colleagues.

- **Data Analyst**

May 2016-June 2020

Bradesco Seguros, Rio de Janeiro, Brazil

- Led a classification project for healthcare providers based on specialty, location, and cost, significantly enhancing hospital negotiation strategies and reducing costs by up to 70%.
- Optimized operational workflows by maintaining and enhancing automated payment models, reducing processing costs by 40% through automation.
- Automated repetitive analytical processes using MS Excel, SAS Enterprise Guide, R, and Python, freeing up 2+ hours per analyst daily to focus on critical projects.
- Managed large datasets using SQL and SAS, ensuring data accuracy and reliability for key business decisions.

- **Junior Data Analyst**

February 2013-May 2016

Bradesco Seguros, Rio de Janeiro, Brazil

- Created detailed reports using MicroStrategy and BusinessObjects, delivering tailored insights to various departments and reaching 90% of the company while gaining expertise in BI tools.
- Collaborated with IT teams in both development and production environments to design, test, and validate new performance metrics, improving data accuracy while managing large datasets.
- Applied statistical methods, including regression analysis and descriptive statistics, using VBA as an analytical tool to enhance operational efficiencies.

CERTIFICATIONS

- **Professional Certificate of Agile and Scrum Business Analyst**

MTF Institute, 2026

- **SAS Programming Basic, SAS Programming Advanced, SAS Enterprise Miner**

SAS Institute, Brazil, 2019-2021
